Bayview Transportation Improvements Project

Notice of Availability of Final Environmental Assessment (EA) and Finding of No Significant Impact (FONSI)

The City and County of San Francisco (City) is proposing to improve the existing roadway system and create a multimodal transportation network within the Southeast Community of San Francisco. The City, in cooperation with the California Department of Transportation (Caltrans), as assigned by the Federal Highway Administration, has released a Final Environmental Assessment (Final EA) and signed a Finding of No Significant Impact (FONSI) for the Bayview Transportation Improvements Project (BTI Project). The purpose of the BTI Project is to improve traffic operations within the BTI Project area to accommodate approved planned growth, develop a more direct access route from U.S. Highway 101 and Interstate 280 to the Candlestick Point and Hunters Point Shipyard areas, and provide multimodal access to the BTI Project area linking it to the rest of San Francisco and the Bay Area region. A public meeting to accept comments on the Draft EA was held on July 8, 2013. Information describing the BTI Project, including potentially significant environmental effects identified in the Draft EA, and responses to comments received during the Draft EA circulation period, are included in the Final EA.

Final Environmental Document (Final EA and FONSI) Availability

- Online: <http://sfdpw.org/index.aspx?page=59>
- Libraries: The Bayview/Anna E. Walden Branch Library, 5075 3rd Street, San Francisco, CA; San Francisco Library, 100 Larkin Street, San Francisco, CA
